Orderliness

Orderliness is having a sense of where things belong and how they relate to each other, and keeping them organized accordingly. Orderliness is living in a way that creates harmony around us and within us. Order and beauty in our homes and work spaces brings a sense of peace and freedom. Orderliness is being focused and purposeful, planning tasks step by step instead of going in circles. To be orderly, we also must have a sense of priorities, of what is most important and what we must let go. We can only put our lives in order if our priorities are clear.
